## HIPERGUARD

**Hiperguard Premium Enhance** is a premium-grade surface impregnator which is used in the final step of the Hiperfloor process. Hiperguard PE

penetrates the concrete to form a film along the surface of the capillaries. This increases the surface tension of the floor, restricting the absorption of water, oil, fats and dirt. Stains are kept at the surface level, which simplifies maintenance and cleaning and extends the lifespan of the floor. Hiperguard PE also helps enhance the color of the material being sealed.

## POLISHGUARD

This non-yellowing formulation enhances the appearance of standard gray, integrally colored, dyed, stained or color-hardened concrete floors.

## DECORATIVE CONCRETE SEALER GUIDE

### SOLVENT BASED

**TK-290 TRI-SILOXANE** is a solvent based, low viscosity oligomeric organosiloxane, one-component, deep penetrating, invisible, non-darkening water repellent for concrete and masonry. It eliminates the ever present moisture that had previously engulfed the cementitious substrate, thus eliminating spalling, freeze/thaw damage, and rebar corrosion. It penetrates up to 1/4 inch and becomes a permanent part of the substrate not allowing water to enter, but allows moisture vapor to pass out of the substrate. Coverage rate is 125 sq. ft. per gal. on most concrete substrates.

**TKTRI01** 1 Gallon, **TKTRI05** 5 Gallon, **TKTRI55** 55 Gallon

**Bright Kure & Seal** is a blend of 100% methyl methacrylate polymers used as a superior exposed aggregate cure, and final sealer and protective coating. Bright Seal is an excellent sealer for architectural concrete, terrazzo, brick, stone, slate, quarry tile, burnish block, or any cementitious material where yellowing or discoloration cannot be allowed. The coating is clear and does not yellow, degrade with age or exposure to ultraviolet rays. Coverage Rate: 100-400 sq. ft. per gal. depending on the porosity of the substrate.
