

# FARRELL SWEEPING COMPOUND

## Product Data Sheet

### Non-petroleum Based Sweeping Compound

#### DESCRIPTION:

FARRELL SWEEPING COMPOUND is a non-petroleum based sweeping compound with enhanced moisture retention and absorption. FARRELL SWEEPING COMPOUND outperforms ANY other sweeping compound available in the market. Picks Up Surface Dust and Dirt - Leaves surface clean with low luster sheen.

Superior Performance - Oil based products (petroleum or soy oil) leave a small amount of oil residue on the floor surface that attracts dust and will track to adjacent floor surfaces, increasing floor maintenance needs and cost. FARRELL SWEEPING COMPOUND leaves no oily residue, and produces a cleaner floor. End users report reduced maintenance needs on floors being swept, as well as reduced maintenance on adjacent floor surfaces, including carpeted areas.

Universal Application - FARRELL SWEEPING COMPOUND contains no oil that can damage asphalt, rubber tile, or wood surfaces, FARRELL SWEEPING COMPOUND performs well on most hard surface floors.

One product covers all surface needs:

- Concrete - Provides the best sweep in the industry.
- Finished Hardwood Floors (including gym floors) - contains no harmful oils, plus contains cleaning agents for a good sweep and low luster sheen.
- Tile - Does an excellent job and reduces the need for washing and dusting.
- Vinyl - Does not breakdown the surface.

Environmentally Safe - FARRELL SWEEPING COMPOUND contains NO petroleum oil or hazardous components.

Product meets Minnesota and California legislation prohibiting oil in landfills. Oil based products result in many thousands of gallons of oil deposited in landfills.

#### APPLICATION:

Use as shown in either method listed below.

*Application Method 1* - Spread FARRELL SWEEPING COMPOUND sparingly over entire area to be cleaned, sweep with a push broom (applying slight downward pressure) within one hour of application on concrete surfaces, 15 minutes on all other hard surface floors.

*Application Method 2* - Generously spread FARRELL SWEEPING COMPOUND along a line at one end of area to be cleaned and sweep with a push broom (Applying slight downward pressure) within one hour of application on concrete surfaces, 15 minutes on all other hard surface floors.

**COVERAGE:** Suggested application rate is 1 pound per 100 square feet.

**DISPOSAL:** FARRELL SWEEPING COMPOUND and most floor contaminants such as dust and dirt can be safely disposed in regular waste streams. If FARRELL SWEEPING COMPOUND is used to pick up hazardous materials, it is the user's responsibility to safely dispose of these materials in accordance with federal, state and local regulations.

**STORAGE:** Keep bag tightly closed between use to retain product moisture.

**PACKAGING:** 100lb. Box #1816F
